

SWEET HOMES INSPECTIONS LLC

Methamphetamine { Meth } Residual Test

Meth

Sweet Homes Inspections LLC offers upon request, QuickCheck presumptive testing Kit Meth/Ecstasy residual test.

A sample amount of suspected drug or residual is placed into an ampoule tube, Then the ampoule tube is broken and if the color changes to a dark blue in less than A minute, a presumptive assumed positive is noted.

This is not a definitive test. A positive results indicates to contact local law Enforcement, then an Industrial Hygienist should be contacted for further evaluation.

A positive results should contact local law enforcement, County Health Department and Building Department.

Tri-County Health Department has good resources on Meth <http://www.tchd.org/methlab.htm>

Most properties can be cleaned, but professional cleaning is expensive, averaging \$ 10,000.00 or more. Meth Lab contaminants may pose health threats to persons exposed to them.
