## Radon Testing

Radon Testing Level is over 4 PCI/L Pico Curies

Radon is a radioactive gas that is colorless, odorless, and tasteless and is impossible To detect without the use of sensitive test equipment.

The Epa presently suggest that corrective action be taken to reduce the radon Level in your home if measured over levels at 4 PCI/L Pico Curies per liter or greater.

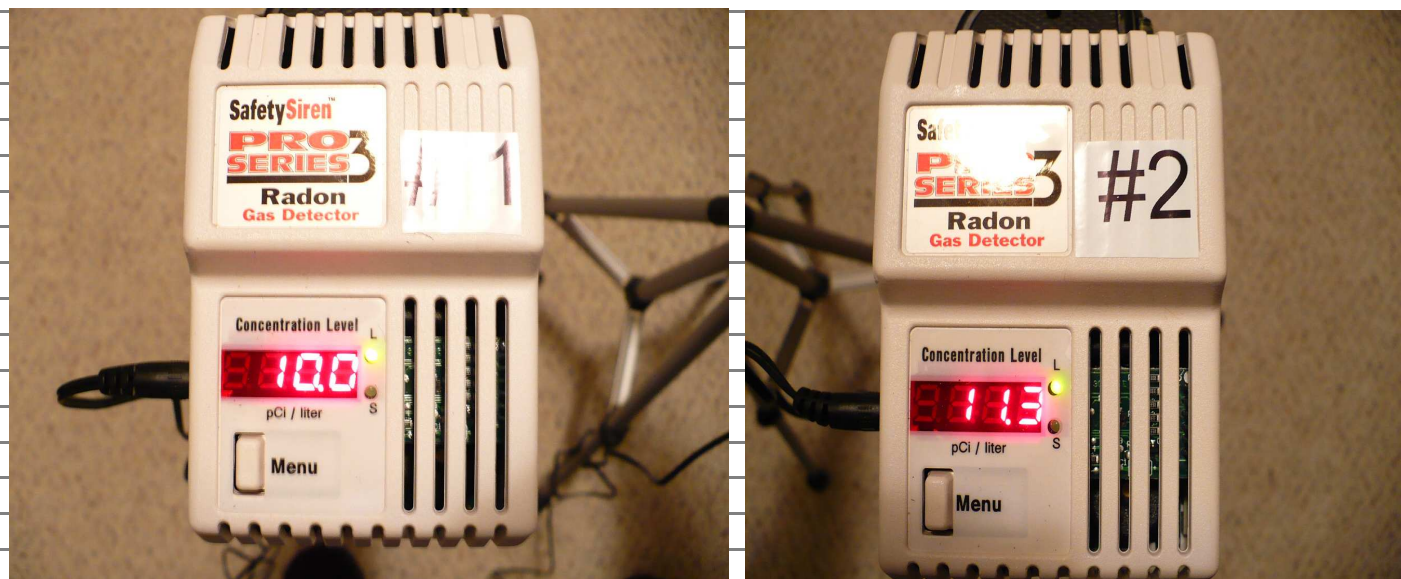

Sweet Homes Inspections LLC uses Pro Series 3 Radon Gas Detectors.

Sweet Homes Inspections LLC uses two units number 1 and 2 and uses the average of both units.

Units must be on the property for a time frame of 48 hours until the units will process reading.

For information on Radon Gas visit Epa web site at [www.epa.gov/iaq/radon/index.html](http://www.epa.gov/iaq/radon/index.html).

Pro Series 3 Radon Gas Detector Accuracy is +/- 20% or 1 PCI/L whichever is greater.

Average PCI/L Pico Curies per liter is unit # 1 10.0 pci/l unit # 2 11.3 pci/l for average of Radon level is 10.65 Pico Curies per Liter, +/- 20% or 1 PCI/L whichever is greater. Epa suggest corrective action be taken to reduce Radon level.
